

Evidence-Based Care-Planning Program

Providing professionals with the tools they need to help families facing an early-stage dementia diagnosis.

OUTCOMES INCLUDE

High program satisfaction, improved communication, increased use of services, and development of a care plan for the future.

Benjamin Rose Institute on Aging provides licensing, training and technical support to organizations offering **SHARE.**

SHARE provides organizations with tools to help their clients voice their preferences for care, and facilitate communication with loved ones, in the early stages of dementia.

SHARE counselors receive a comprehensive toolkit to help them guide families through the 5-session program (plus optional family session):

- SHARE Program Manual
- SHARE Counselor Certified Online Training Course
- SHARE Guide for Families
- SHARE Counselor's Guide
- SHARE app for iPad
- SHARE Magnet Boards and Magnetic Tiles

Each **SHARE** session is designed to engage both the person with early-stage dementia and their care partner in discussions about symptoms, communication, care values and preferences, healthy activities and planning for the future.

BENJAMIN ROSE
INSTITUTE ON AGING
SERVICE • RESEARCH • ADVOCACY

“There are some very powerful conversations during the SHARE sessions. Each person has permission to care for themselves, and the person who has dementia is confident that their care partner will make good decisions down the road.”

SHARE COUNSELOR

**Proven to be effective
through rigorous research!**
